

SYSPRO ERPs Actionable Insights

Empower Users and Improve Business Performance

For Manufacturers and Distributors including:

Automotive Parts and Accessories • Electronics • Fabricated Metal • Food and Beverage • Industrial Machinery and Equipment • Packaging • Plastics and Rubber and Many More.

The Challenge

- Lack of visibility and inaccurate or outdated information hindering decision making and planning
- Aligning key strategy elements with operational areas and measures to improve business performance
- Finding the software tools that empower individuals to perform to their full potential
- Retrospective reports don't provide users with the means and insights to take immediate action.

The Solution

- **Actionable Business Insights:** Get a single, real-time view of the company's key business drivers with the flexibility to define operational goals at all levels with SYSPRO Business Insights. By providing individuals with relevant and real-time business-critical insights and the means to act quickly and proactively, KPI's are converted into meaningful improvement.
- **Social ERP Collaboration Tool:** Share and relate critical business insights, data trends and intelligence with your co-workers instantly to solve problems faster with SYSPRO Harmony, a user-friendly social media platform at the core of your SYSPRO ERP system.
- **Corporate Performance Management:** Identify revenue trends, create assumptions and analyze potential adjustments by automating critical financial processes across the entire organization with CPM for SYSPRO.
- **Factory Performance Analytics:** Visualize losses and effectively measure and improve business performance with SYSPRO's Manufacturing Operations Management solution which surfaces the availability, performance and quality metrics for each employee and machine in real-time.

The Benefits/What You Can Do:

- Make proactive and informed business decisions with increased visibility across the organization
- Drive business behavior by providing your users with actionable insights for quicker analysis, decision making and execution
- Improve business performance through a productive workforce that is empowered to take action
- Increase responsiveness, lead times and overall productivity
- Increase collaboration and seamless connectivity across the entire organization
- Improve profitability and minimize risk with increased visibility into your company's financial health.
